SPORTS PEOPLE: BASEBALL; Strawberry Surgery Is Successful

DARRYL STRAWBERRY, who played in just 42 games for the Los Angeles Dodgers this season, underwent successful lower-back surgery yesterday. "The operation technically went very well," Dr. ROBERT WATKINS, who performed the surgery, said in a statement. "Darryl tolerated the anesthetic and the procedure went as planned. He will begin his rehabilitation program in three weeks." Watkins removed a fragment of intervertebral disk in Strawberry's lower back during the operation at Centinela Hospital Medical Center.
